- Once you have installed Respondus Lockdown Browser on your laptop, you can start the exam (View assessment).
- You will need to grant Lockdown Browser to make changes on your laptop/device, and probably you will be requested to close not allowed programs that are currently running on your laptop. Maybe you will need to close them manually.
- Once the exam starts, you cannot close it and you must finish in just 1 attempt.
 - In case you experience any issue (Ej. Connectivity) during the exam, you may need to close and exit Lockdown Browser, registering the reason.
 - You will be able to come back to course and continue the attempt where you left it, once the issue is solved.
- When you finish your exam, you must submit the results.
